

C R E P E

A fresh face for a familiar chair category, Crepe offers an elegant alternative for dining or guest seating applications. Pressing the limits of conventional curved plywood technology, Crepe's flowing shell surface exquisitely tapers from the center toward the top edges of the back and front of the seat. Perched atop a simple and graceful steel base, the shell is offered in faux exotic veneers as well as opaque colors on ash and more than 30 Leland Colours on maple.
