

Stylish and sturdy, elegant and airy, the Cricket bench from **Leland International** features a dynamic assembly of steel rods to support the segmented seating surfaces. The bench is offered in two, three, four and five positions of linear or arc models and can create linear, circular or serpentine configurations when linked together. The seating surface can be specified in exposed curved wood and finished in Leland Colors, a selection of high-pressure laminates, or upholstered.

The Sky Stool from **Sittris** is available in three seat heights: desk height, counterstool, and barstool. The seat, which swivels a full 360 degrees, may be covered in Siliform™, Sittris' patented process that applies silicone as an "upholstery." Silicone is an ideal health care upholstery because it does not support microbial growth, does not offgas, and is easily cleaned with soap and water.

Seating

Xantos office chairs—one of six seating families offered by **Kimball Office | interstuhl**—are a harmonious blend of performance and aesthetics. Easy-to-use comfort controls adjust precisely to fit people of all sizes and postures. Xantos also features a graceful frame and balanced proportions that allow it to blend into any workplace setting—from offices and conference rooms to reception areas and training facilities.

Sedia Systems introduces the On Time portable conference chair. Designed by Baldanzi and Novelli, the On Time chair is like none other. Its compact design, modern shape and wide range of accessories provide a versatile and stylish alternative to traditional stacking or folding chairs. On Time's seat flips up and its sides fold into a compact envelope just under 10 inches deep. It is ideal for meeting rooms and multi-use areas in businesses, schools, hotels, and training centers.
