# HANDY STOOL

Design by Stephen Philips

“ For Handy, I wanted to create a refined, sculptural shape, with a lightweight and dynamic feel using a single material for the structure. Above all, I wanted Handy to be a likable product—one that’s easy for people to use in a range of environments. ”

- Stephen Philips, ARUP

HANDY Design by Stephen Phillips

“ We have intentionally chosen 100% recyclable polypropylene for Handy. Using this material in a precious way, creates a sculptural, functional product of value that is intended to be used and cherished for a long time. ”
